Membership History

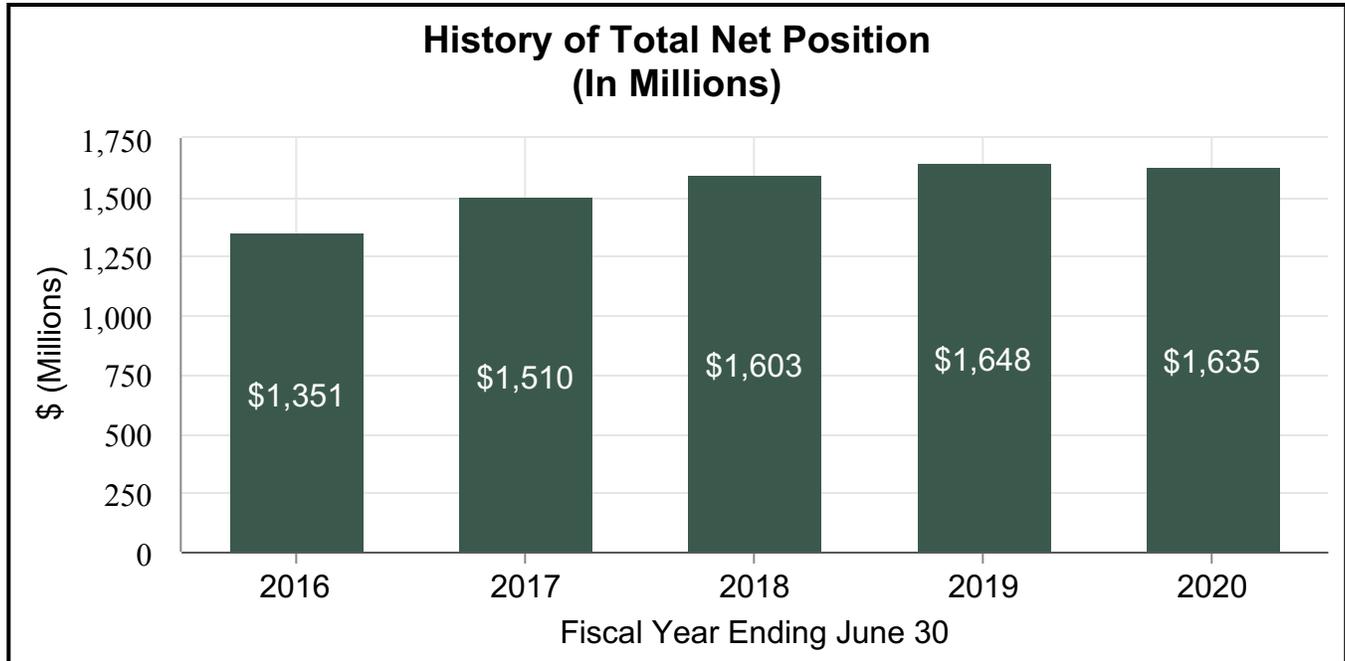

Funded Status

The System's funding objective is to meet long-term benefit obligations through contributions and investment income. As of June 30, 2020, the date of the last actuarial valuation, the funded ratio for the System was 116.3 percent reflecting that the System has a valuation value of assets which is in excess of the actuarial accrued liability. In general, this indicates that for every dollar of benefits due, we have approximately \$1.16 of assets available for payment as of that date. As of June 30, 2019, the date of the previous annual actuarial valuation, the funded ratio for the System was 117.0 percent; and as of June 30, 2018, the funded ratio for the System was 120.3 percent.

Total Net Position

At June 30, 2020, the City of Fresno Fire and Police Retirement System had total assets of \$1.707 billion, less total liabilities of \$72 million, for a total net position restricted for pension benefits of \$1.635 billion compared to \$1.648 billion at June 30, 2019. “Net Position Restricted for Pension Benefits” represents funds available to pay benefits. It is a point in time or a snapshot of account balances as of the fiscal year-end (i.e., June 30). It indicates the assets available for future payments to retirees and any current liabilities. Increases and decreases in Net Position Restricted for Pension Benefits, when analyzed over time, may serve as an indicator of whether the System’s financial position is improving or deteriorating. Other factors, such as market conditions, should also be considered in measuring the System’s overall health.
